The hatred of the Kurdish people's increases enemies day after day towards the lawful case and the tural rights of the Kurds in order to deform the real aim of this case and suppress the geographiead, cultural landmarks supposing that these actions will put an end to their ambitions in living a deent life and decide their destiny.

This time "Shingal" was the target of these enemies, This aneient city which belongs in its history to the stone era and its population is the Yezidi Kurds who live in this area since aneient ages and known

**Editor\_in\_Chief**

with steady positions, unlimited defence for their land and for the Kurdish nationality despite the exposed to through history in one hand and the injustice and persecution they faced on the other hand. This can be the best evidence for their maintainance to the land and their aneient religion inspite of the unequality of the powers, but all this didn't reduce their intention in facing the enemies from aneient times up till now.

The criminal hatful operation which was exeuted in Gir Izer and Sepa Sheikhdry districts by the criminals on 14/8/07 on Tuesday and vietimized more than one thousand Yezidi people. This operation was massive as those of Al-Anfal and Halabcha. The savage crime oe-cured when mentioned areas were exploded by four explosive vans full of heavy explosive masterials followed by shelling bombs after a few minutes of the explosive to exterminate the rest of those Kurds who insisted to be joined to Kurdistan Region and to live peacefully with their brothers.

The enemy of this country is the same because it didn't distinguish the infant baby from the women or the Yezidi from the Muslim or the Christian.

This sevage operation was lite the previous ones which ocured in Halabcha and other regions inabitanted by the Kurdish people. The aim of these explosions was very obvious which is in its randomly forcing the Kurds in these areas to leave their places and emigrate to other areas so that these savage people can control the fate of the pop-ulation. Also it is an attempt to abord and to obstruct the appliciation

of the {140} article of the constitution. On the contrary, the attempts of the enemies failed and that is because of the great harmony among the people of Kurdistan. The organizations of civil community and the people inside and outside the Homeland by introducing the unlimited support including their blood, money and human supplies to their brothers the Yezidi Kurds which manifest the human and national connection among the people of one country.

A lot of the Kurdish people supported their Yezidi brothers in this disaster by granting all what they could grant and organizing demonstrations and protests to support them, and the martyrdom of the martyr "Ayaz" is the proof on the connection among the religious components in Kurdistan that is because he said the truth and refused to give up. So his martyrdom was like firing a bullet on Kurdish nationality's heads and a power factor to the residence of the catastrophic areas which made them insist to hold on to their land and not leaving it to the enemies, especially for respecting the souls of the martyrs who died for their people. We must not forget the role and the great interest of the wise Kurdish government headed by the Mr. Masud Al-Barzany. in helping the people of these areas and giving orders to the concerned authorities in Kurdistan by offering all what can be offered to these miserable people and sending the Region's guard forces to protect the inhabitants of those Kurdish areas which are from Kurdistan.
